EXPERICENCE

Product designer , Conglomerate IT Solutions

Sep 2025 – Present

Ask Diya: AI-powered education decision platform

- Led end-to-end product design from 0 to 1, defining core architecture and scalable UX flows
- Reduced decision-making time by 40% by consolidating fragmented research into a guided experience
- Achieved 80%+ positive user feedback on recommendation relevance and usefulness
- Increased engagement with 70%+ profile completion and 40% return rate
- Built and scaled a design system, reducing UI development effort by 30%

As Product Designer

- Owned product design direction across key initiatives and ensured design quality
- Collaborated closely with product and engineering to align business and user goals

Jokerz: US-based bakery platform

- Designed a subscription model to drive recurring revenue and repeat purchases
- Introduced a loyalty program, improving retention and customer engagement
- Optimized checkout flows, reducing drop-offs and improving conversion rates

Product designer , Craft My Plate

Apr 2025 – Sep 2025

Craft My Plate mobile application

- Increased repeat orders by ~11% through post-order engagement systems (loyalty, referrals, lifecycle nudges)
- Improved conversion by simplifying pre-order flows with structured, guided UX
- Designed internal tools for order management and fulfillment, reducing operational friction
- Owned end-to-end design across consumer and backend experiences
- Built and maintained a scalable multi-product design system

Product designer ,Beta Trading Company

Apr 2025 – Sep 2025 (contract)

Beta Trading Company website

- Redesigned product experiences across financial services (trading, distribution, PMS offerings)
- Simplified complex financial workflows, improving clarity and usability
- Increased user confidence through better information architecture and UX patterns
- Established a scalable design foundation for future product expansion
